## Timber Venetian Blinds

Do you want

- A modern stylish blind?
- Functional elegance with easy care?

Control the light with the versatile **Aviance Timber Venetian Blind**.

The elegant and timeless solution to the problems of light control, ventilation and privacy.

**Aviance Timber Venetian Blinds** offer a range of colours and options.

Tilt them just enough to see through and retain privacy or raise completely out of the way for maximum view and ventilation.

**Aviance Timber Venetian Blinds** are easy to clean and operate. They are designed for a long life and are a decorative and practical addition to any room.

Timber Venetians are made from "Basswood" or "Western Red Cedar".

These are plantation trees that are grown specifically for timber blinds.

**Basswood** slats are finished in a Polyester lacquer. Because basswood is a naturally pale wood there is less colour variation between slats than for other timber species. Basswood slats are 50mm wide.

**Cedar slats** are given an oil or lacquer finish to enhance the grain and protect the wood.

Choose from 46 or 60mm blade sizes.

Maximum size for both Basswood and Cedar blinds is 4 square metres. They can be made larger but these will carry no warranty. Maximum width for Basswood is 2400mm and for Cedar 4000mm.
