

Trion Cross Folding Arm Awning

Do you want

Projection greater than width

Rugged construction?

Manual operation or Electric operation with optional remote or automatic control?

Then you need the **Trion Cross Folding Arm awning**

The **Trion Cross Folding Arm Awning** is designed so the arms fold under each other instead of being on the same level so that you finish up with an awning with greater projection than width.

The **Trion Cross Folding Arm Awning** can be adjusted to operate from horizontal to 45°. Maximum projection is 3500mm on an awning that can be as little as 2250mm wide
