Roller Blind

Aviance Roller Blinds are designed to harmonise with your style throughout your home.

When closed, **Aviance Roller Blinds** give excellent privacy, and may be positioned at any point in their drop to allow light control. With the addition of a Cassette and side guides the amount of light escaping around the cloth may be minimized.

When fully open, **Aviance Roller Blinds** give maximum visibility.

Aviance Roller Blinds have a smooth, modern look because of their neat, inconspicuous hardware and their lack of side hems. **Aviance Roller Blinds** may be finished with a neat aluminium bottom rail or any of the traditional trims.

Operate with traditional spring, chain or electric motor
