Aluminium Louvre

The **Aviance Aluminium Louvre** is the stylish modern alternative to fabric awnings. It is designed to withstand wind, rain and sun.

Open wide in winter to let the sun in. In summer rotate to allow in cooling breezes and screen the sun's harsh rays.

Made from extruded aluminium for strength and low maintenance.

Colour to contrast or blend with the tones of the building. The durable powdercoated or anodized finish is easy to look after.

The modern minimalist lines are a bold architectural statement.

Slide sideways on heavy duty rollers or cover one window—you have total flexibility to control the elements.

Use as a privacy screen to keep you safe from prying eyes on the sides of balconies or patios in addition to its sun control properties
