Aluminium Venetian

The **Aviance Aluminium Venetian** blind is the most practical window covering.

You can control light, ventilation and privacy in a stylish window covering that comes in a large variety of colours.

Options:

With the Valencia option you can make your **Aviance Venetian** blind even more stylish. The headrail has an extended front to minimise the light gap at the top of the slats and the gap above the blind is minimised with the low profile brackets.

With the "no holes" option the holes required for the cords to raise and lower the blind are smaller and positioned at the back of the blind, the slats are closer together than usual so that with the blind rotated shut the holes are not visible

Operate with wand and cord lift
