## Synthetic Timber Venetian

Real timber Venetian blinds add a wonderful touch but what about wet areas?

**Aviance Synthetic Timber Venetians** love wet areas. You can even totally immerse them in water when they need to be cleaned. You cant do that with real timber unless you like that "distressed" look.

They come in a range of colours and even prints that are difficult to distinguish from real wood.

Choose from totally synthetic or wood composites.

Woodwinds wood alloy slats are guaranteed never to fade, crack or warp. They have an antistatic coating to resist dust but can also be totally immersed in water without harm.
